

## Phase 2: Application Demo Requirements

For Phase 2, students are required to **develop and demonstrate a GUI application** that is connected to the database designed during Phase 1. There is **no written report** required for this phase but an ER diagram printed and **provided** (as hardcopy NOT softcopy) during the demo.

### Requirements:

- **Language of Choice:** Students may use any programming language to develop the application.
- **Database Connection:** The application must connect to the database schema developed/implemented in Phase 1.
- **GUI Operations:**
  - The application must support **Insert, Delete, Update, and Search** operations through graphical user interface elements.
  - **ComboBoxes** (or equivalent controls) must be used to load and select **foreign key** values in forms.
  - The application must use appropriate UI components (e.g., tables, lists, detail views) to display the results of queries clearly and effectively.
- **Demonstration:**
  - Each group of students will present a **live demo** of the developed application on their **own laptop or PC**.
  - The application must be **fully functional** and **interact with the actual database**.
  - **Demo scheduling** will be managed via the shared sheet linked above.

### Deadline:

- Phase 2 Demo: **8/6/2026 as per the schedule (Google form)**

### Late Submission Policy:

- Early demos are encouraged.
- Late demos will incur a **ONE mark deduction per day**, up to a maximum of **three working days**.
- None providing the ER as hardcopy will incur a **ONE mark deduction**.
